Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions - Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28 and 31-32, drawn to a foldable storage structure and an apparatus forming a collapsible, portable storage structure, respectively, classified in class 220, subclass 4.29.
- II. Claim 30, drawn to a method of erecting a foldable storage structure, classified in class 52, subclass 745.14.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the foldable storage structure and the apparatus forming a collapsible, portable storage structure as claimed both can be made by another and materially different process such as one which does not require the step of removing the eight wall panels, the plurality of roof panels, and the plurality of floor panels from the flexible pouch.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Election/Restrictions

This application contains claims directed to three groups of species of the claimed invention from which Applicants must elect a single species. The three groups of species of the claimed invention from which Applicants must elect a single species are as follows:

Species I (as directed to flexible pouches): Fig. 11; Figs. 17-21; and Fig. 22.

Species II (as directed to hinged couplings for the wall, roof or floor panels - see claims 3-5, 12-14, and 22-24): nylon strapping; webbing; fabric; plastic; leather; and belting.

Species III (as directed to material for wall panels - see claim 19): extruded hollow core polypropylene sheet; cardboard; plastic; foam core board; polyvinylchloride sheet; metal; wood; and wood base materials.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species from each of the three groups of species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, independent claims 1, 10, 20, 29, and 30 appear to be generic.

Applicants are advised that a reply to this requirement must include an identification of the species from each of the three groups of patentably distinct species

that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
